Predictive Services Discussion: The high pressure ridge will become centered over the Four Corners, keeping the West hot and dry until afternoon convection begins. Low afternoon humidities will allow for the developing scattered storms to begin as mostly dry before moistening up in the late afternoon. The focus of the convection will be over Oregon, California and the Great Basin. A cold front will begin dropping south into the northern Great Plains from central Canada, bringing breezy winds and cooler temperatures to North Dakota and eastern Montana late in the day. Breezy northwesterly winds will extend east to the mid-Atlantic states by afternoon, as temperatures remain just below normal.

AVIATION MISHAP RESPONSE

Aviation Category

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period. Response plans have to be briefed to all on the crew.

- Immediate, positive action is necessary. Any delay may affect someone's chances of survival.
- Conduct rescue operations keeping the following priorities in mind:
 - Preserve life. Rescuers first!!!
 - Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.
 - Document and/or photograph the location of any debris that must be disturbed in order to carry out rescues and/or fire suppression activities.
 - Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.
- Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire.
- Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site.
- Do not exceed your physical limitations.
- **Activity:** *Review your unit's mishap response plan with the crew. Consider practicing with a crash rescue drill or scenario.*
